Securities & Corporate Governance

Securities and Corporate Governance is a broad term that describes a wide array of regulatory complexities that issuers and investors maneuver in the course of capital-raising activities, including reporting and disclosure obligations.

We offer a broad spectrum of all-encompassing corporate and securities services to a variety of business entities, ranging from entrepreneurs seeking counsel on business formation and capital raising transactions, to private equity firms requiring assistance with portfolio companies, to publicly-traded companies seeking representation in public offerings of debt and equity securities and general advice on regulatory and compliance matters. Our attorneys provide counsel to senior management, boards of directors, and the committees of public and privately-held companies in connection with corporate governance matters.

We work closely with in-house counsel, boards of directors, and senior management to provide sophisticated and timely counsel that leads to informed decision making and compliance with federal and state laws. Working side-by-side with you allows us to provide creative and comprehensive advice tailored specifically to your needs in an efficient and effective manner.

Our strength is in the depth and breadth of our attorneys' knowledge and expertise. Our cross-disciplinary team collaborates to provide creative solutions and substantial value in positioning you and your business for growth and success in a constantly evolving, complex legal environment.
